Pakistan Kidney Center (PKC)

First Charitable Project Of Pakistan Welfare Society

"A Project We Are Building Together"

SAVE KIDNEYS LIVES

Background

About 10 million people suffer from various kidney related diseases in Pakistan. Basic reason for abundance of kidney related diseases in Pakistan is poor health system which includes lack of awareness and treatment of diseases like diabetes, hypertension, and kidney stones etc. which are major causes of kidney failure. Lack of dialysis treatment facilities in the government hospitals with long waiting time which is approximately one year. During this time, 50% of patients requiring dialysis treatment die within few months, because they can't afford expensive dialysis treatment in private sector or poor quality of dialysis etc.

Recognizing the need for specialized kidney hospitals in the rural areas of Pakistan, the Pakistan Welfare Society (PWS) Jeddah envisioned the Pakistan Kidney Center, the first charity kidney hospital in the area of Abbottabad-Hazara Division of KP province.

Pakistan Kidney Center VISION

PKC aspires to become a center of excellence for Diagnosis, treatment, Prevention as well as research on kidney diseases in Pakistan.

Pakistan Kidney Center MISSION

Our mission is to bring the state of the art facilities for Dialysis and treatment of kidney diseases for people of Pakistan, especially for the most deserving and needy to save their lives and to help them to live near normal life.

Message from Dr. Abdul Qadeer Khan at Ground-Breaking Ceremony.

"This project is the need of the time and it is righteously focused to fight a very vital disease. Having said that the cure for this disease is very expensive and dialysis twice a week can bring anyone down to their knees. Help for these critical people is extremely essential."

Message from Mr. Aftab Ahmed Khokher Counsel General Pakistan, Saudi Arabia

"The Pakistan Welfare Society is providing commendable services to the Pakistani Community in Saudi Arabia. The Pakistan Kidney Center is a charitable project of the PWS in Pakistan. We call upon all philanthropists to extend full support to this noble initiative."

Facilities at Pakistan Kidney Center
